Art Unit: 2122

DETAILED ACTION

- 1. This action is responsive to the application filed April 24, 2001.
- 2. Claims 1-83 have been examined.

Information Disclosure Statement

3. The Office acknowledges receipt of the Information Disclosure Statement filed June 25, 2003. Since the date of publication of several of the references (e.g., Switch Engine, Conditional Execution Engine, etc.) was not provided, the Office uses the date of publication of the WorkflowViewTM program, which is December 10, 1998 (see attached copy of snapshot of U.S. Copyright Office Web Site, Registration No. TX-5-122-061) for art rejection purposes.

Drawings

4. The drawings filed April 24, 2001 are approved by the examiner.

Claim Rejections - 35 USC § 112

- 5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 6. Claims 68 and 69 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 68 recites the limitation "said condition" in line 4. There is insufficient antecedent basis for this limitation in the claim.

Art Unit: 2122

Claim 69 recites the limitation "said condition" in line 5. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 8. Claims 1-83 are rejected under 35 U.S.C. 102(b) as being anticipated by Heuristic Physics Laboratories, Inc.' s("HPL") software development tools (YIELDXplorerTM, WorkflowViewTM, etc.).

Claims 1, 17 and 20

HPL discloses at least:

means for displaying a workspace on a computer screen (see at least WorkflowViewTM, Users Guide, Figure 3-1 and related discussion in the Users Guide); and

means for displaying a plurality of objects on said computer screen individually selectable to be placed and coupled together in said workspace to define a workflow for a user interactive program, wherein at least one of said plurality of objects has at least one interactively alterable operation parameter during execution of said user interactive program (WorkflowViewTM, Users Guide, Figure 3-1 and related discussion in the Users Guide).

Art Unit: 2122

Claim 34

Since claim 34 recites all of the features of claim 1, claim 34 is also rejected for the same reason. Per claim 34, HPL further discloses wherein at least one of said plurality of objects performs an interactively alterable switch function for directing data flow within said user interactive program (see Switch Engine, User Manual, pp. 4-7).

Claims 35 and 49

Since claims 35 and 49 recite a software development tool employing the same workflow means for displaying of the tool recited in claim 20, the same rejection is applied. HPL further discloses wherein at least one of said plurality of objects facilitates branch processing according to a user indicated selection from displayed information generated by said user interactive program (see at least Conditional Execution Engine, User Manual, pp. 4-8).

Claims 50 and 66

Since claims 50 and 66 recite a software development tool employing the same workflow means for displaying of the tool recited in claim 20, the same rejection is applied. HPL further discloses wherein at least one of said plurality of objects facilitates assigning a name to a selected input port of another one of said plurality of objects so that data may be provided directly to said input port (see at least WorkflowViewTM, Users Guide, section 5.2, "Setting External Input/Output Engine Properties).

Claims 67 and 83

Since claims 50 and 66 recite a software development tool employing the same workflow means for displaying of the tool recited in claim 1, the same rejection is applied. HPL further discloses wherein at least one of said plurality of objects prompts a user for input when a condition is met while executing said user interactive program (see at least Figure

Art Unit: 2122

23-1, Conditional Execution Engine, User Manual and related discussion in the manual).

Claims 2 and 18

The rejection of base claims 1 and 17 is incorporated. HPL further discloses means for developing a user interactive programs with that at least one properties page including at least one interactively alterable operation parameter is displayable to a user prior to execution of said user interactive program (see at least Figure 5-2: Example of Display Properties Page Window; Workflow ViewTM, Users Guide, section 5.1.1).

Claims 3 and 19

The rejection of base claims 1 and 17 and intervening claims 2 and 18 is incorporated. HPL further discloses wherein said at least one properties page includes a properties page for each object having at least one interactively alterable operation parameter (see at least Figure 5-2: Example of Display Properties Page Window; WorkflowViewTM, Users Guide, section 5.1.1).

Claims 4, 21, 36, 53 and 70

The rejection of base claims and intervening claims is incorporated. HPL further discloses wherein one of said plurality of objects is a first input object for extracting first specified data from a first selected database (see at least Figures 1-1, 5-4 "Path to Field", WorkflowViewTM, Users Guide).

Claims 5, 22, 37 54 and 71

The rejection of base claims and intervening claims is incorporated. HPL further discloses wherein another one of said plurality of objects is a second input object for

Art Unit: 2122

extracting second specified data from a second selected database having a different schema than said first selected database (see at least Figures 1-1, 5-4; WorkflowViewTM, Users Guide).

Claims 6, 23, 38, 55 and 72

The rejection of base claims and intervening claims is incorporated. HPL further discloses means for developing a user interactive program, such that at least one properties page including an interactively alterable switch function for directing data flow from said first and second input objects to a remainder of said workflow is displayable to a user prior to execution of said user interactive program (see at least Figure 4-6, WorkflowViewTM, Users Guide; Figure 20-3, Switch Engine, User Manual).

Claims 7, 24, 39, 56 and 73

The rejection of base claims is incorporated. HPL further discloses wherein one of said plurality of objects is an output object programmable to store output data in a specified output file (see at least sections 4.1.3, 4.1.4 - NOTE: -, WorkflowViewTM, Users Guide).

Claims 8, 11, 25, 28, 40, 43, 57, 60, 74 and 77

The rejection of base claims and intervening claims is incorporated. HPL further discloses wherein said specified output file resides on a remote computer (see at least Figure 1-1 "Metadatabase", Figure 5-4 "Servers", WorkflowViewTM, Users Guide).

Claims 9, 26, 41, 58 and 75

The rejection of base claims and intervening claims is incorporated. HPL further discloses wherein said output object is programmable to provide said output data to an executable program (see at least Figure 5-4 and related discussion in the manual, WorkflowViewTM, Users Guide).

Art Unit: 2122

Claims 10, 12, 27, 29, 42, 44, 59, 61, 76 and 78

The rejection of base claims and intervening claims is incorporated. HPL further discloses wherein said output object is programmable to provide said output data to an executable program, and launch said executable program (see at least Figure 5-4 and related discussion in the manual, WorkflowViewTM, Users Guide).

Claims 13, 63 and 80

The rejection of the base claim is incorporated. HPL further discloses wherein one of said plurality of objects performs an interactively alterable switch function for directing data flow within said workflow (see at least Figure 4-6, WorkflowViewTM, Users Guide; Figure 20-3, Switch Engine, User Manual).

Claims 14, 31, 46, 64 and 81

The rejection of the base claim is incorporated. HPL further discloses wherein one of said plurality of objects facilitates branch processing according to a user indicated selection from displayed information generated by said user interactive program (see at least Conditional Execution Engine, User Manual, pp. 4-8).

Claims 15, 32, 47, and 82

The rejection of the base claim is incorporated. HPL further discloses wherein one of said plurality of objects facilitates assigning a name to a selected input port of another one of said plurality of objects so that data may be provided directly to said input port (see at least WorkflowViewTM, Users Guide, section 5.2, "Setting External Input/Output Engine Properties).

Art Unit: 2122

Claims 16, 33, 48 and 65

The rejection of the base claim is incorporated. HPL further discloses wherein one of said plurality of objects prompts a user for input when a condition is met while executing said user interactive program (see at least Figure 23-1, Conditional Execution Engine, User Manual and related discussion in the manual).

Claims 30, 45, 62 and 79

The rejection of the base claim is incorporated. HPL further discloses wherein one of said plurality of objects has at least one interactively alterable operation parameter (see at least Figure 5-2: Example of Display Properties Page Window; WorkflowViewTM, Users Guide, section 5.1.1).

Claim 51

The rejection of base claim 50 is incorporated. HPL further discloses wherein said data is provided by a user indicating a container for said data through a string command to execute said user interactive program (see at least Figure 4-11, WorkflowViewTM, Users Guide).

Claim 52

The rejection of base claim 50 is incorporated. HPL further discloses wherein said data is provided by another computer program by indicating a container for said data through a string command to execute said user interactive program (see at least Figure 4-11, WorkflowViewTM, Users Guide).

Claim 68

Art Unit: 2122

The rejection of base claim 67 is incorporated. HPL further discloses wherein another of said plurality of objects is a condition object facilitating interactive specification of said condition (see at least Figure 23-3: Conditional Execution Engine Workflow Usage; Conditional Execution Engine, User Manual).

Claim 69

The rejection of base claim 67 is incorporated. HPL further discloses means for developing a user interactive programs uch that a properties page associated with said condition object and facilitating interactive specification of said condition is displayable to a user prior to execution of said user interactive program (see at least Figure 23-3: Conditional Execution Engine Workflow Usage; Conditional Execution Engine, User Manual).

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Template Software teaches Developing a WFT Workflow System, WFT Version 8.0, Second Edition, Date of publication October 31, 1997.

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hoang-Vu A Nguyen-Ba whose telephone number is (703) 305-0103. The examiner can normally be reached on Tuesday-Friday, 6:15 - 15:45.

Art Unit: 2122

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tuan Dam can be reached on (703) 305-4552. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
